

Burlo Plastic Motor Fans and Hubs

Fans and Hubs for the Motor Repair Industry

Advantages: Each fan comes with interchangeable hubs to fit a wide range of shafts
 The number of hubs required is greatly reduced as each hub fits two fan sizes
 Each fan has a blank bore '0' hub which can be easily machined for non-standard shafts
 Two keyways of different sizes are cut in each shaft
 Hubs can be inserted in the fan from either the concave or convex surface of the fan and snap firmly into a locking mechanism.
