# **Ripley<sup>™</sup> E 468-2**

#### **Product Description**

Ripley<sup>™</sup> E 468-2 is a single-component, heatcured, 100% solids epoxy impregnating resin.

#### **Areas of Application**

The Ripley<sup>™</sup> E 468-2 product line is the industry standard for impregnation of transformers of all sizes

#### **Features and Benefits**

- Flexible for excellent noise suppression
- No separate catalyst required
- High flash point
- UL recognized insulation systems up to Class 240

#### **Application Methods**

- Vacuum-Pressure Impregnation
- Vacuum Impregnation
- Dip-and-Bake

#### **Transportation / Storage**

Store below 25°C / 77°F in a dry controlled environment out of direct sunlight. This material should be suitable for use stored under these conditions in the original sealed containers for six (6) months from the date of shipment.

Usable life may be extended by refrigerated storage at  $5^{\circ}C / 41^{\circ}F$ .

For best results, VPI storage tanks should have a replenishment rate of 10% or more per month and employ cooling systems to maintain the resin at  $20^{\circ}C / 68^{\circ}F$  or below.

Mix thoroughly before use

#### Health / Safety

Refer to the Material Safety Data Sheet.

### **Curing Schedule**

Preheat units, as necessary, to remove moisture and set tapes. Allow units to cool to below 30°C / 86°F before immersion to promote good penetration while not overheating the resin.

Cure VPI-treated units for 5 hours at 135°C / 275°F – or – 3 hours at 150°C / 302°F

Cure schedule is based on time after unit reaches specified temperature
