

laminates

Acuflex® DMD 100, DM100

- ▶ **Tough, affordable laminates for wide variety of applications**
- ▶ **Excellent resistance to cut through and edge tear**
- ▶ **Many UL systems including Acuflex® laminates are available for class B and F designs; may often be used as secondary insulation through class H**
- ▶ **Wide range of constructions to optimize mechanical and electrical designs**
- ▶ **Standard color is blue, but white and other colors are available**
- ▶ **White version is acceptable for use in most hermetic motor applications**

request from Von Roll USA, Inc., 200 Von Roll Drive, Schenectady, New York 12306 (518) 344-7100. Similar information sheets for solvents and other chemicals used with this product may be obtained from the appropriate supplier and used accordingly.

Shelf life

Shelf life is in excess of one year when stored at room temperature.

Specifications

The properties shown above are typical values only, and should not be used as a basis for preparing specifications. Contact our Customer Service department, (518) 344-7100 for assistance in preparation of specifications for your specific system application.

General description

Acuflex® DMD 100 triplex and DM 100 duplex polyester mat/polyester film laminates are constructed of high-density polyester mat and electrical grade polyester film bonded with Von Roll's Thermal Bond adhesive system. The polyester film contributes high dielectric strength, tear, tensile and burst strengths. The high-density polyester mat in combination with Von Roll Isola's proprietary Thermal Bond adhesive and topcoat provides exceptional heat stability.

Properties

Application

Acuflex® DMD 100 and DM 100 laminates are suitable for use in fractional to the largest rotating electrical equipment as slot, phase and end turn insulation and as ground and wrapper insulation in dry type transformers. They are well suited for punched and fabricated parts and produce excellent heat formed parts such as wedges and slot interlining insulation. The smooth, non-sloughing surface of these materials allow for excellent performance in automated winding equipment. These laminates also meet the requirements of MIL-1-22834 and MIL-1-917D.

Health and safety

Material Safety Data Sheets defining the known hazards and describing safety precautions appropriate for this product are available upon

contained in this data sheet. Nothing contained in this data sheet constitutes representation or warranty as to any matter whatsoever. Von Roll makes no warranties whatsoever in this data sheet, expressed or implied, including any implied warranty of fitness for a particular use or purpose. Von Roll shall in no event be liable for incidental, exemplary, punitive or consequential damages.
